

# 08 - Proposal Templates

Reusable proposal structure. Add company branding, commercial terms and approved project-specific details before issuing externally.

## Proposal cover

PROJECT / SERVICE PROPOSAL Client: [Client Name] Project: [Project Name] Prepared by: [Company / Contact] Date: [Date]  
Proposal reference: [Ref]

### 1. Client requirement

[Briefly describe the client need, project context, requested deliverables and deadline.]

### 2. Proposed scope

- Drawing / document review
- Quantity take-off
- BOQ preparation
- Estimating / tender support
- Shop drawing / technical documentation
- Revisions and coordination
- Checking / QA process
- Reporting / communication

### 3. Deliverables

[List exact files, formats, schedules, drawing outputs and any exclusions.]

### 4. Programme and turnaround

[State agreed dates, milestones, response times and dependencies. Never state a guaranteed date without confirmation.]

### 5. Commercial options

| Option           | Description                    | Commercial basis |
|------------------|--------------------------------|------------------|
| Project package  | Defined scope and deliverables | [£ / fixed fee]  |
| Hourly resource  | Resource used as required      | [£ / hour]       |
| Monthly retainer | Dedicated recurring capacity   | [£ / month]      |

### 6. Assumptions and exclusions

[List drawing quality assumptions, client inputs, revisions included, site visits, engineering sign-off, statutory approvals, software access and anything not included.]

### 7. Quality and communication

Describe checking, document control, communication channels, file naming, revision control and approval workflow.

## 8. Pilot option

For suitable clients, offer a small defined pilot to demonstrate quality and working process before moving to a wider arrangement.

## 9. Acceptance

[Insert commercial terms, start date, authorised signatory, payment terms and governing terms as approved by management.]

## AI proposal rules

- Only use verified client/project details.
- Do not invent prices or terms.
- Do not promise engineering responsibility, certification or statutory approval unless explicitly included and approved.
- Highlight missing inputs before drafting the final proposal.
