Company size	Approximately 10 people, based on current internal information discussed with the company; public sources do not state a verified headcount. Source: Internal working information; not independently verified

Use this document as a working company profile. Publicly verifiable facts are clearly separated from internally supplied or inferred information.

1. Company Profile - Requested Information

The following section answers each item in the requested screenshot directly, with verification notes so the profile can be used for internal planning, proposals, website copy, or CRM/AI knowledge bases.

Requested field	Verified / researched answer	Confidence / note
Company name	CoExtend Global LLP	Publicly verified in LinkedIn company/job materials.
What your company does	Provides construction estimating, quantity takeoffs, drafting and BIM support, tender support, shop/fabrication drawings, as-built documentation, commercial support, and software development/custom digital products.	Publicly stated in current job/company description.
Location	Pune Division, Maharashtra, India. Founder profile also shows professional links to the UK and Canada markets.	Pune is public; overseas presence should not be interpreted as registered offices unless separately verified.
Target countries	United Kingdom, United States, Canada.	Explicitly stated in company/job positioning.
Industries	Engineering services; construction; façade/cladding; roofing; pre-construction/commercial estimating; architectural/technical drafting; technology/software companies.	Construction and engineering are public. Other categories reflect the service scope described publicly and in your operating model.
Company size	Approximately 10 people currently, based on internal information; public headcount is not established.	Internal figure; treat as approximate.
Years of experience	15+ years of combined industry experience. Founder profile separately states 14+ years in façade detailing and project estimation.	Publicly stated; wording reconciled for current 2026 profile.

Requested field	Verified / researched answer	Confidence / note
Main services	Construction estimating; quantity takeoffs; BOQs; tender support; façade/roofing estimating; shop drawings; fabrication drawings; BIM/modeling; as-builts; commercial/variation support; custom web/mobile apps; SaaS/cloud solutions.	Strong public support for these service families.
Competitive advantages	Deep façade/estimating specialization; extended-team model; UK/US/Canada standards awareness; fast delivery; scalable resourcing; NDA-friendly working; combination of technical delivery and software capability.	Some performance claims are marketing claims and should be independently substantiated before being used as guarantees.
Typical clients	Contractors; façade/cladding contractors and fabricators; consultants; construction businesses; technology companies/startups needing technical or software capacity.	Explicitly supported by current company/job description and public posts.
Typical projects	Commercial façade and roofing tenders; quantity takeoff and BOQ packages; shop/fabrication drawings; BIM/drafting packages; as-built documentation; variation/commercial support; custom software/SaaS projects.	Project types are clear from public service descriptions; named client/project list is not publicly verified in this research.
Contact information	Website: www.coextendglobal.com Email: info@coextendglobal.com LinkedIn: CoExtend Global LLP.	Publicly surfaced contact channels. No phone number or legal registered-office address was safely verified in the available sources.

2. What CoExtend Global Does

CoExtend Global is positioned as an outsourced technical partner / extended delivery team for construction and technology businesses. Its public company description combines engineering-services delivery with software development, which is a distinctive part of the business model.

Construction & built-environment delivery

- Construction estimating and cost analysis
- Quantity takeoffs and BOQ preparation
- Façade and roofing estimating
- Tender support and bid documentation
- Shop drawings and fabrication drawings
- BIM and drafting support
- As-built documentation
- Commercial assistance including budgets, variations, cost reports and project records

Technology & digital delivery

- Custom web and mobile application development
- SaaS product development
- Cloud solutions and digital workflow systems
- Construction-tech products that connect estimating, documentation and project information

Core market proposition: help contractors, fabricators, consultants and technology businesses increase technical capacity without having to build every specialist function in-house.

3. Typical Clients, Projects & Competitive Advantages

Typical clients

- Façade and cladding contractors
- Façade / architectural metal fabricators
- General and specialist contractors
- Roofing contractors
- Consultants and engineering/design practices
- Construction businesses requiring outsourced estimating or drafting capacity
- Construction technology companies and startups requiring engineering or software resources

Typical project work

Workstream	Typical output	Typical client need
Estimating	Takeoffs, BOQs, cost estimates, tender schedules	Fast, accurate bid support
Façade	System/material quantities, panel/cladding schedules, accessories	Specialist façade capacity
Roofing	Areas, trims, flashings, accessories, budgets	Tender and procurement support
Drafting / BIM	Shop/fabrication drawings, models, revisions	Production capacity and documentation
Commercial	Variations, cost tracking, reports, tender records	Commercial administration support
As-built	Record documentation based on final information	Handover / closeout
Software	Web/mobile apps, SaaS and cloud workflows	Internal automation or product development

Competitive advantages

- Façade specialization rather than a generic back-office positioning.
- Combination of estimating + drafting/BIM + commercial support across one delivery relationship.
- Ability to work to UK / US / Canada construction conventions and documentation expectations.
- Flexible scaling through dedicated-resource and project-based support models.
- Technical + software capability, enabling the company to build internal tools and client-facing workflows.
- NDA-friendly and remote delivery model, useful for confidential tender and technical information.

Marketing-claim caution: public posts currently claim examples such as 24-72 hour turnaround, 98% on-time delivery and 300+ successful projects. These should be treated as claims from company marketing material, not independently audited performance metrics.

4. Location, Target Countries & Contact

Operating location publicly shown	Pune Division, Maharashtra, India. Source: LinkedIn job listing, reviewed 8 Sep 2026
Target market - UK	Construction contractors, façade/cladding businesses, consultants and other technical clients requiring estimating, drafting, commercial and dedicated-resource support. Source: Company positioning
Target market - US	Contractors, fabricators, consultants and construction-tech businesses requiring takeoffs, estimating, drafting/BIM and digital development. Source: Company positioning
Target market - Canada	Construction and engineering clients requiring estimating, drafting/BIM and technical delivery; public messaging references CSI/MasterFormat awareness. Source: Company positioning / public post

5. Recommended One-Paragraph Company Description

CoExtend Global LLP is a Pune-based technical services company supporting construction and technology businesses across the United Kingdom, United States and Canada. The company provides construction estimating, quantity takeoffs, BOQs, tender support, façade and roofing estimating, shop and fabrication drawings, BIM/drafting, as-built documentation and commercial project support. Alongside its built-environment services, CoExtend Global develops custom web and mobile applications, SaaS products and cloud solutions. Its positioning is built around specialist technical knowledge, flexible remote capacity, long-term client partnerships and the ability to operate as an extended technical team.

6. Final Verification Note

The requested fields are covered in Section 1. Publicly supported facts are based primarily on current LinkedIn company/job materials and the founder profile reviewed on 8 September 2026. Company size is treated as an internal approximate figure. Legal registration details, registered office address, phone number, audited headcount, revenue and named customer/project references were not independently verified and should be confirmed from official corporate records before external publication. Public performance figures such as 24-72 hour turnaround, 98% on-time delivery and 300+ projects are retained only as marketing claims and should not be presented as audited guarantees.
