

## Marketing Objective

Primary objective: consistently generate qualified conversations with UK and other target-market façade contractors and construction businesses that need estimating, take-off, tender, technical documentation or shop drawing support.

## Primary Audiences

| Audience                        | Likely Problem                          | Message                                                                       |
|---------------------------------|-----------------------------------------|-------------------------------------------------------------------------------|
| Owners / Managing Directors     | Growth without enough internal capacity | Flexible external capacity without immediately hiring.                        |
| Commercial / Estimating Leaders | Tender volume and deadline pressure     | Reliable estimating and take-off support during peaks.                        |
| Pre-Construction Teams          | Large tender workload                   | Structured support to increase capacity and keep tenders moving.              |
| Technical / Design Managers     | Shop drawing backlog                    | Additional drawing production capacity under clear instructions and checking. |
| Existing clients                | Need flexible extra capacity            | Retainer or hourly support that can scale with workload.                      |

## Service Pillars

- Façade estimating and cost support
- Quantity take-off and detailed measurement
- BOQ preparation and tender support
- Shop drawing and technical drawing support
- Retainer resource model
- Hourly resource model
- Free pilot project to demonstrate workflow and quality before further engagement

## Content Mix

| Content Type            | Suggested Share | Purpose                                         |
|-------------------------|-----------------|-------------------------------------------------|
| Educational / technical | 30%             | Build authority and usefulness.                 |
| Problem / pain point    | 20%             | Help prospects recognise their own bottlenecks. |
| Service / solution      | 20%             | Explain how support works.                      |
| Founder insight         | 15%             | Build trust through personal perspective.       |
| Case study / proof      | 10%             | Demonstrate genuine outcomes.                   |
| Offer / CTA             | 5%              | Create direct opportunities.                    |

## Channel Plan

| Channel               | Cadence                      | Role                                                              |
|-----------------------|------------------------------|-------------------------------------------------------------------|
| LinkedIn Company Page | 2-3 posts/week               | Authority, services, case studies and company updates.            |
| Personal LinkedIn     | 2-3 posts/week               | Founder credibility, lessons, opinions and relationship building. |
| Email                 | 1-2 targeted campaigns/month | Direct outreach and nurturing.                                    |
| Short Video           | 2-4/month                    | Explain one problem or service in 30-90 seconds.                  |

## 90-Day Goals

- Establish a consistent publishing rhythm.
- Build a reusable library of technical and commercial content.
- Create a qualified prospect pipeline.
- Track which topics produce replies, meetings and opportunities.
- Turn successful content and sales messages into repeatable templates for AI.

## Human Approval Rule

AI drafts and recommends. A human reviews before external publication or outbound sales communication. This is especially important for technical claims, client references, confidential information and pricing.

Editable template - replace bracketed placeholders with your company-specific information.
